

Abdul Baqi

Software Engineer — Laravel & Backend Systems | AI Tooling & MCP Development

📍 Lahore, Pakistan 📞 +92 312 423 5113 ✉️ abdulbaqi77ab@gmail.com [LinkedIn](#) [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of professional experience specialising in Laravel/PHP backend development, RESTful API design, and scalable web application architecture. Currently building AI-powered tools and MCP (Model Context Protocol) integrations at Smartlane, enabling intelligent automation for e-commerce merchants. Proven track record across logistics, travel, SaaS, and fintech domains. Seeking challenging engineering roles in Germany where deep technical expertise meets product innovation.

WORK EXPERIENCE

Smartlane | February 2026 – Present

Software Engineer

- Developing MCP (Model Context Protocol) tools in Laravel to power Smartlane AI — an AI assistant for e-commerce merchants, enabling intelligent order management, fulfilment insights, and automated workflows.
- Built and maintained Shopify App backend using Laravel, integrating Shopify APIs, webhooks, and OAuth 2.0 to automate order processing workflows for merchants.
- Designed secure, scalable webhook handling pipelines with async queue processing to ensure reliable event-driven fulfilment operations.
- Developed Smartlane Wallet — a merchant financial management module handling balance tracking, payouts, and transaction ledgers.
- Built Smartlane Invoices — an automated invoicing system integrated with order and logistics data for merchant billing and reconciliation.
- Implemented third-party logistics (3PL) integrations to bridge e-commerce orders with carrier and warehouse systems.

Virico | Lahore, Pakistan November 2024 – January 2026

Laravel Developer

- Designed and implemented a fully automated Truck Dispatching Platform (Tyga Smart), improving logistics operational efficiency by 50%.
- Built a community-driven church platform (Redefine Church) with social features, event management, registrations, and notifications — similar in scope to a social network.
- Developed custom RESTful APIs for seamless module communication, ensuring scalability and performance under production load.

Xint Solution | Lahore, Pakistan August 2024 – November 2024

Laravel Developer

- Developed and maintained a multi-service travel booking platform covering flights, hotels, and car rentals — increasing booking efficiency by 40%.
- Integrated multiple airline, hotel, and car rental APIs for real-time availability and pricing data.
- Improved database query performance by 75% through advanced indexing and query optimisation techniques.

Solutionwin Technologies | Lahore, Pakistan March 2021 – July 2024

Laravel Developer

- Led a team of 3 developers across multiple client projects, reducing average project delivery time by 85% through process optimisation.
- Integrated 30+ third-party APIs across diverse domains (travel, payments, logistics, communication).
- Built KingRiders and KingLimousine — SaaS fleet management platforms for UAE clients (King Group of Companies), managing driver accounts, bookings, ledgers, and regulatory compliance (RTA, visas, permits).
- Developed KingDrive, a maintenance tracking sub-app for delivery vehicle repairs and parts management.
- Enhanced client satisfaction by 70% through consistent delivery quality and proactive project communication.

TECHNICAL SKILLS

Backend: PHP, Laravel, RESTful API Design, Webhook Handling, Queue/Async Processing, OAuth 2.0

Frontend: JavaScript, jQuery, Vue.js, React, Next.js

Databases: MySQL, MariaDB, MongoDB, Query Optimisation, Indexing

AI & Tooling: MCP (Model Context Protocol), AI Tool Development, Shopify API Integration

DevOps & Tools: Git, GitHub, Linux/WSL, cPanel/VPS Deployment, Nginx, Postman, WinSCP

Other: Jira, Trello, Slack, VSCode, PHPStorm, Workbench, MongoDB Compass

EDUCATION

Bachelor of Science — Computer Science *October 2018 – October 2022*

University of South Asia, Lahore, Pakistan

Full Stack Developer Certificate 2020

House of Professional (HOP) — Affiliated by PSDF | 360 hours intensive training | Score: 85%

SELECT PROJECTS

Smartlane AI (In Progress)

AI assistant for e-commerce merchants powered by custom MCP tools built in Laravel. Enables merchants to query order status, fulfilment data, and logistics insights via natural language through an AI interface.

Tyga Smart — Truck Dispatching Platform

SaaS-based Laravel platform for fleet dispatching, real-time shipment tracking, and route optimisation for logistics businesses.

URL: <https://tygasmart.com>

KingRiders / KingLimousine — Fleet SaaS (UAE)

SaaS fleet management systems for King Group of Companies (UAE), managing drivers, bookings, ledgers, and compliance with Uber, Careem, Yango integrations.

URL: <https://kingriders.manage-fleet.com>

Online Travel Agency Suite

Unified booking platform for flights, hotels, and travel packages deployed across 5+ travel brands (FlyEasy, GeoTravels, Meezab Group, DTravels, MYTM Travels).

URL: <https://flyeasy.pk>

Redefine Church — Community & Events Platform

Laravel-based social + event management platform for church communities with posting, event scheduling, registrations, and notifications.

URL: <https://redefine.church>
